RE: Major Modification (Appendix I) to Building 776/777 Closure Project Decommissioning Operations Plan

Dear Mr. Legare:

The Colorado Department of Public Health and Environment hereby approves the June 30, 2003 dated version of Appendix I to the Building 776/777 Closure Project Decommissioning Operations Plan (DOP).

Given the fact that much of this building will not be decontaminated to unrestricted release criteria prior to demolition, its dismantlement will generate substantial public scrutiny. In the interest of assuring that demolition of Building 776/777 is conducted in a manner that minimizes releases to workers and the environment, CDPHE intends to work closely with your contractor as work packages are developed and as building demolition is initiated.

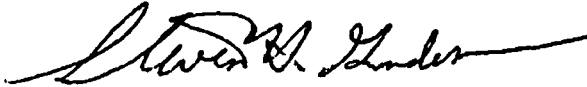

Many technical details for demolishing this building remain to be developed and are not included in this DOP appendix. We intend to work collaboratively with you as the details are developed for fixing and encapsulating residual contamination. Additionally, details for protection of debris piles during the process of size-reduction and with waste-container loading subsequent to demolition will need to be shared with the Department prior to initiation of demolition. As we have discussed with your contractor and your staff, we believe that if the co-located is protected, the environment will also be protected. We will be very interested in the protective measures implemented during demolition and will want to review the monitoring and Radiation Work Permit (RWP) procedures that will be used.

Dear Mr. Gunderson:

The purpose of this letter is to transmit Revision 1 page changes to the Final Pre-Demolition Survey Report (PDSR) for Building 701. This change incorporates comments received from the Colorado Department Public Health and Environment on Revision 0 of the PDSR transmitted previously for review and concurrence. If you have any questions, please contact Gary Schuetz at 303-966-3016.

Sincerely,

Joseph A. Legare, Director
